BASCA

Cleaning equipment for tanks and containers

BascaLine is a modular line for automatic IBC washing, designed to adapt to production layouts and workflows. It washes both the interior and exterior of containers with rapid cycles, reducing manpower and operating costs. The modular structure enables the integration of various options to increase automation levels and scale alongside production.

SCAN ME

BENEFITS

Fast IBC cycles

Internal and external cleaning

CE and ATEX compliance

Full process automation

Scalable production system

Integrated fluid management

Modular layout flexibility

Low operating costs

MODULES

Loading stations
Pre-wash and rinsing stations
External washing stations
Infeed and outfeed buffer conveyors
Hot air drying stations
Leak testing stations
Inspection stations
IBC stacking stations
Labeling stations
Storage tanks
HMI control panel with remote assistance
Heating system for water storage tanks
