

BascaRec S100/S200

*Recycling units
for solvents*

BascaRec S100/S200 series solvent distillers are designed for high-volume needs to be processed. BascaRec S100/S200 offer high flexibility, integrated controls and modular configurations to optimize sustainability and reduce costs in complex manufacturing environments.

BASCA

Cleaning equipment for tanks and containers

BENEFITS

Less solvent consumption

Less waste disposal

Circular economy

Cost efficient

Heavy-duty continuous use

Lower environmental emissions

Seamless process integration

CE & ATEX compliant

TECHNICAL DATA

SOLVENTS

Size S100 (LxWxH): 2600x1700x2500mm

Size S200 (LxWxH): 2700x1900x2800mm

Air cooled condenser

Stainless steel lid

Heating power: 8 kW to 12 kW

PLC controlled with intuitive color HMI

ATEX Ex II 2G (zone 1)

Production capacity: 300 to 800 L/day

Payback in 6 months

ACCESSORIES

- Stainless steel air cooled condenser
- Stainless steel water cooled condenser
- Automatic loading
- Scraper for self vessel cleaning
- Vacuum generator
- Nitro cellulose safety kit
- Residual discharge into IBC or Drums
- Remote control for PLC
- Side ladder
