

BascaRec S400/S800/S1600

**Recycling units
for solvents**

BASCA

Cleaning equipment for tanks and containers

BascaRec S400/S800/S1600 series solvent distillers are designed for high-volume needs to be treated, even in fully automatic mode. Thanks to advanced automation and high production capacity, these systems allow for the continuous reuse of recycled solvents, maximizing efficiency, sustainability and reliability in production-intensive environments.

BENEFITS

Less solvent consumption

Less waste disposal

Circular economy

Cost efficient

Heavy-duty continuous use

Lower environmental emissions

Seamless process integration

CE & ATEX compliant

TECHNICAL DATA

SOLVENTS

Size S400 (LxWxH): 3100x1900x3900mm

Size S800 (LxWxH): 4400x4400x4400mm

Size S1600 (LxWxH): 5900x5800x4300mm

Air cooled copper condenser

Stainless steel lid

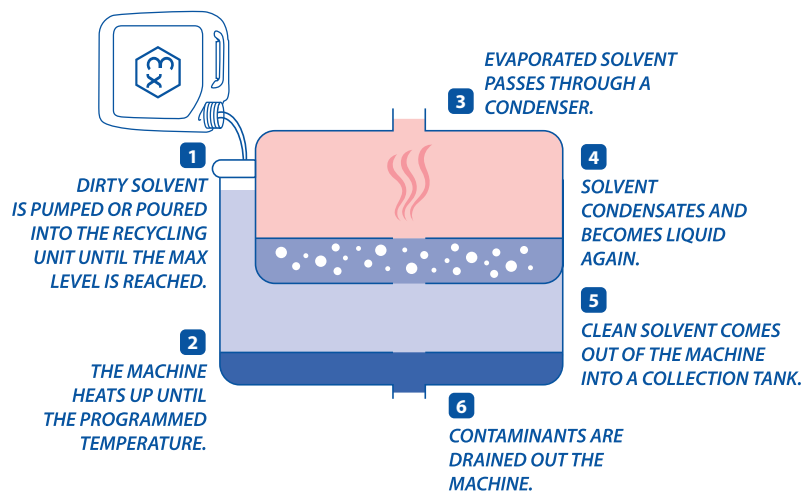

Heating power: 30 kW To 80 kW

PLC controlled with intuitive color HMI

ATEX Ex II 2G (zone 1)

Production capacity: 400 to 10000 L/day

Payback in 6 months

ACCESSORIES

- Stainless steel air cooled condenser
- Stainless steel water cooled condenser
- Scraper for self vessel cleaning
- Vacuum generator
- Nitro cellulose safety kit
- Residual discharge into IBC or drum
- Remote control for PLC
- Side ladder
